An Immersive Media & Entertainment Company.

- 20+ Fulldome & VR Shows Produced
- 30+ Planetariums & Dome Theaters Served
- 15+ Countries Reached
- 8K Maximum Production Resolution

Aeon Immersive is a full-service immersive media production company based in Mumbai, India. Specialised in fulldome film production, 360°

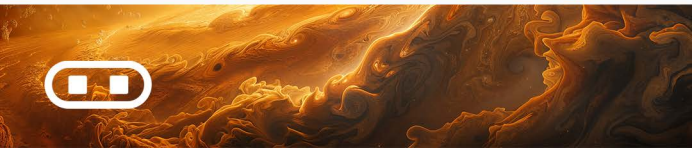

VR content creation, 3D animated science documentaries, & spatial audio design for the world's leading planetariums, science museums, dome theaters, & VR platforms.

Our productions are delivered in resolutions up to 8K, in fisheye dome master format compatible with all major fulldome projection systems — including Digistar, Sky-Skan, RSA Cosmos, and Evans & Sutherland. Every show is mixed in 5.1 surround or Dolby Atmos spatial audio for a truly enveloping experience.

From a dinosaur documentary for a children's science museum in Chengdu, to a cosmic journey commissioned for a European planetarium — we bring ambitious visions to life under the dome. Our team blends cutting-edge AI-assisted animation pipelines, classical Indian artistic traditions, and global scientific storytelling to produce content that resonates across cultures and age groups.

Whether you are a planetarium director looking to license a ready-made show, or an institution commissioning an original production, Aeon Immersive delivers world-class immersive content — on time, at scale, and at a standard your audiences will remember.

THE GREAT DINOSAUR SECRET

For decades, we pictured the Mesozoic Era as a world ruled by giant, scaly, green monsters. But science has uncovered a breathtaking, colorful truth hidden deep within ancient fossils.

The Great Dinosaur Secret is a thrilling, 360-degree fulldome adventure that transports audiences back in time to witness the ultimate story of survival and evolution.

Discover a world where the mighty T-Rex started life as a fluffy chick, where massive marine reptiles flew through the ocean currents, and where tiny, feathered pioneers learned to catch the wind.

When the asteroid struck, the giants fell—but the cleverest survivors simply took to the sky. Look closely at the birds outside your window. You aren't just looking at a bird. You are looking at a dinosaur

ALIENS AMONG THE STARS

Strap in for the ultimate high-speed cosmic roller coaster! Aliens Among the Stars is an explosive, immersive full-dome experience that blasts you lightyears from Earth into a realm of pure sci-fi fantasy. Completely enveloping you in stunning 360-degree visuals, this spectacular journey plunges you into bottomless alien oceans, drops you over churning seas of glowing lava, and hurtles you through the crimson mists of a world bathed in the light of a giant crystal moon. Leave the textbooks behind and let your imagination run wild! While inspired by the names of real exoplanets, this show is an all-out, adrenaline-pumping thrill ride designed to bring the wildest, most unbelievable alien creatures to life right in front of your eyes.

8 SCOOPS OF MILKY WAY

Nestled in the spiral arm of the Milky Way, our solar system is home to eight extraordinary planets and a powerful sun. Though vastly different from one another, these celestial bodies come together in perfect harmony—a harmony we've captured in "8 Scoops of Milky Way."

From the blazing sun and Venus' lava-filled surface to Jupiter's stormy belts and Saturn's breathtaking eclipse, this show offers never-before-seen footage specially crafted for dome theaters. Experience the uniqueness and beauty of our solar system in this captivating journey through space. Also available in 360° VR

ORIGIN OF THE UNIVERSE

Our Universe is a breathtaking marvel, from the smallest atoms to the largest galaxies, from mysterious black holes to the very fabric of space and time. The Big Bang—the most widely accepted theory of the Universe's origin—laid the foundation for everything we know.

Join us on an immersive journey through the birth and evolution of the Universe, as the dramatic events of the Big Bang unfold before your eyes. This captivating experience will transport your audience back to the beginning of it all, offering a front-row seat to the cosmic forces that shaped our world.

BIZARRE MOONS

The Moon has always been Earth's most prominent companion in the night sky, but in 1610, Simon Marius and Galileo Galilei expanded our view by discovering Jupiter's four largest moons. Today, our solar system boasts 178 named moons orbiting eight planets, each revealing astonishing traits that often outshine their planetary parents.

As technology has advanced, these moons have shown us incredible, unimaginable worlds. Join us for a journey through the most frigid, violent, and bizarre moons in the solar system with "Bizarre Moons"—a tour like no other.

ONCE UPON THE BIG BANG

"Once Upon the Big Bang" delves into one of the leading explanations of how our Universe came into existence—the Big Bang Theory. Beginning with a singularity, the Universe has been expanding over the past 13.8 billion years to become the vast cosmos we know today. While current technology can't take us back to the very moment of creation, much of our understanding comes from mathematical models and theory.

This show takes audiences on an immersive journey through the birth of time and space—from an infinitesimal point to a super-hot speck, and finally to the expansive Universe of our era. Experience stunning 3D visuals that bring the incredible story of the Big Bang to life.

PURSUING THE DWARFS

The classification of Dwarf Planets has divided the world—those who fondly remember Pluto as a planet, and those who embrace a simpler cataloging of celestial bodies. Dwarf planets are fascinating worlds: too small to be considered full-fledged planets, yet too large to be classified as asteroids.

Born like the eight major planets, these “embryonic planets” halted their development early on, but they hold valuable clues to understanding planetary evolution. Join us in “Pursuing the Dwarfs”, our fulldome show that offers a glimpse into these mysterious, miniature worlds of our solar system.

Our Other
Venture

Neural Naad is where Ancient
Vibration meets Modern Energy.

We are not here to just create music; we are here to awaken the dormant energy within you. For centuries, Mantras were seen only as rituals. We believe they are powerful 'Code' for the human mind—tools to destroy fear, remove obstacles, and unlock limitless focus.

Our mission is to decode Sanatan Dharma for the new generation. We blend the timeless power of Vedic Mantras with cinematic soundscapes, heavy percussion, and brainwave entertainment to create a sonic experience that is not just heard, but felt.

Whether you need the fire of Kaal Bhairav for your workout, the focus of Shiva for your work, or the protection of Hanuman for your spirit—Neural Naad is your source of power.

Join us in rediscovering the science of Sound.
